

HUMAN DEVELOPMENT IN THE WOMB

7 WEEKS TO 18 WEEKS

“You would be hard-pressed to find the expression ‘Clump of Cells’ in a book on embryology or foetal development.

“The foetus is NOT part of the woman’s body. What organ, muscle or skeletal part has limbs, organs, its own blood type, and unique genetic structure? One searches in vain through Gray’s Anatomy for a body part called ‘foetus’.” - Professor Ray Denehy
